Chapterization

S.N	Chapter	Page
1.	Importance of plant nutrient	1-19
2.	Carbon cycle and its utility	20-33
3.	Hydrogen and importance in plant structure	34-55
4.	Oxygen-a structural nutrient	56-76
5.	Role of Nitrogen	77-97
6.	Phosphorus: a key to energy	98-117
7.	Potassium-importance and scope	118-134
8.	Calcium & magnesium: base cation for crop production	135-150
9.	Sulfur- element for oilseed	151-170
10.	Zinc-role in crop production	171-188
11.	Copper- key to enzymatic activities	189-206
12.	Manganese-Micronutrient for crops	207-223
13.	Iron : role in plant growth	224-242
14.	Nickel- importance in root nodule chemistry	243-260
15.	Molybdenum: Plant root nodules	261-280
16.	Boron: importance in seed production	281-299
17.	Chloride- role in tuber crops	300-318

18.	Plant nutrient deficiency	319-338
19.	Soil testing and its importance	339-359
20.	Instruments using in estimation of metal and metalloids	360-385
21.	Effect of climate change on plant nutrient uptake	386-408
References		409-413
