Review: 25/09/2026 **Acceptance:29/09/2026** **Publication:28/10/2026**

Abstract,

Perceiving all the destructive activities demanding peace in the region where war and destruction taking place in some corner of the world. Consequently, the super conscious mind of the people sparkling the light for the maintenance of sustainable peace and stability in the human world. Keeping in view of such malignant behavior of the people, lord Buddha boldly standing for the maintenance of peace in the world so that it would be a sincere suggestion to make an International Peace Center in Lumbini in the Birth place of Buddha for every negotiation that successfully maintain peace in the human world. Regarding all these Nepal should stand firmly from the birth place of Buddha raising the movement to reach to the Solution of all the dispute that may instrumentally becoming the tonic for the maintenance of peace in the entire world. Therefore, the need of the Buddhist learning becoming significantly identical campaigns to transform every citizen in the entire countries into well-disciplined to work for the maintaining of peace in the human world.

Truly, peace in every livelihood in the entire world would be best use for the holistic development to make all people satisfied rightly. Consequently, peace workers ever need to stop the atrocities if raising any corner in the world, so as experiencing the war in between Russia and Ukraine. The, latest major phase of the Russia-Ukraine war began on **February 24, 2022**, when Russia launched a full-scale invasion of Ukraine. This marked a dramatic escalation of the broader **Russo-Ukrainian War**, which originally began in **February 2014** with the annexation of Crimea and the conflict in the Donbas. (web). After the end of cold war in 1990 the conflict in the region raised due to the pain of dismantling he stats that are gone to be independent at all.

Similarly, conflict starting since 7 Oct 2023, the Palestinian militant group Hamas led a coordinated, surprise land, air, and sea assault on Israel from the Gaza Strip. (web) needs to be settled soon for the maintainance of peace because this ware threatening not only for this region but also that terrifying the entire human world need to be stopped soon. Due to escalating conflict Iran and some other nations concerning to this issue and starting to hit Israel. Accordingly, the US came Infront on the support of Israel and started to hit Iran, becoming gravely terrible movement to the entire world. Following the fearful environment the US, herself drawn into a deep pit of hardship if realized by the US that would be a right escaping moment to become away from the controversial war situation.

[1] Former Secretary General, Management Association of Nepal, Former Division Chief, Agricultural Development Bank Nepal, Nepal.

Consequently, atrocities wherever evoked must be stopped because that would not pay any benefit to the fighters from either side. Realizing the result from the war all the ruler, intellectuals including general public must learn the lesson of Buddha Ashtanga Marga to become peaceful noble citizen that becomes the right instrument to solicitate the situation maintaining peace in the human word. Afterward, human welfare through economic prosperity could be ascertained by adopting the Buddhist Economics. Obviously, economics prosperity relatively coined to the resources, what has been defined in the Asta Ja (Eight Ja) framework, Ja: identified as one of the 8th letter of Nepali vernacular to form the name of the resources goes as: Jal-water, Jamin-land, Jungle-forest, Jadibuti- Medicinal and aromatic herbs, Jarajuri-plants, Jalabayu- climate, Janawar-animal, and Janashakti-human resource are the resources available in the surrounding nature that may use for the production of the products to satisfy human in their community.

Besides the identification of the resources there arises the need of the management workers they may go for transforming the raw resources into final products for human use. Concerning to carry out the management of the resources there arises the need to train the human resource to go for production that definitely becomes the Ashtanga Marga (Eightfold Path) of Buddha that goes as: Right view, Right intension, Right speech, Right action, Right livelihood, Right effort, Right mindfulness and Right concertation. If all the community members of the model village committee, trained by giving the lesson of Ashtanga marga, they would definitely become noble member of the community working together for the welfare of the community. Like this every community living learn the lesson of Buddha they never hold the arms to kill the others and if so, happen somewhere they would be working how to stope such the atrocities. Extending the program as a package coined by Ashtanga marga, and Asta ja the community totally transformed into peace loving groups that may contribute for the maintainance, of peace in the human world stopping the war in between Russia and Ukraine, and presently, US, Israel against Iran and if happen elsewhere would be settled immediately that may navigate the program for the maintainance, of peace in the human world.

Keywords: socio-economic development, destructive activities, Peace and Prosperity, Establishment of International Peace Center in Lumbini, Buddhist Economics, Welfare of the community, Ashtanga Marga (Eightfold Path) learning, Asta Ja (Eight Ja) resource framework, maintainance of Peace in the human world.

Part -I
Introduction.
1.1.Buddhism Guarantees Peace and Development

Ornamental value of peace in the society what has been widely recognized matters that may maintain human welfare in the entire world. Because, peace ever inspires people to work hard for themselves utilizing the resources perfectly in the entire world. Since the starting of civilized society people used to be forming some of the safeguarding force from their representation. This force used to be check around where the community people residing within the land defined in the boundary of community livelihood. Accordingly, the same force transformed into the powerful ruler, as they were in the form of monarch, president, ministers and so other proudly thinking they are the Ruler of particular sector of geography in this globe. Gradually that becoming powerful ruler started ruling over the people within the defined territory, that was again transformed into the state, nation, presently that's are the countries with specific modalities become the matter of the study of the people these days.

Nevertheless, the formation of the nation along with the strong sense of nationality in the social surrounding becoming a strong part of civilization that may defined with various methods of philosophical ground. However, the state comprising with some ruler that may in the form of king or president to govern the nation would be

hoped very tactful to work for the welfare of the people residing in the country safeguarding the territory defined during the time of forming the nation.

Unquestionably, a success of an institute or that may need to rule, the leader must be charismatic to rule over the nation. Then the effective leaders inspiring the people, civilians and the workers in different field with right direction to become success through a combination of integrity, strong communication, and emotional intelligence considering the entire strategies that may become supportive for the welfare of the people around.

Considering the crux of the characteristics needed for the ruler to work for the welfare of the people rightly safeguarding the nation. Previously, ruler used to be following the advice of the sages and the great Gurus, (preachers) who independently guiding to rule the nation maintaining welfare of the people safeguarding the country with due attention. So, Intellectual guidance of the great sages and scholar bearing in mind that valued a lot to the palace that process become fruitful to the ruler. Obviously, the need arising to be wise enough swimming into the vastness of, wisdom that may adorable as to be deserving as the Buddha that becomes powerful matter than that of the arms equipment.

For instance, of ancient India during the Maurya Empire Chandra Gupta Maurya 320 BCE – c. 298 BCE) was the pioneer of the well academic path, politics, and economic planning was the navigator of the empire ruling by Chandra Gupta Maurya, so that Maurya became successful to establish Maurya Empire in India. With these instances the ruler must be backed by the academicians and thinker to decide what could be forwarded for the welfare of the people residing in the countries. Similarly, confusions in China used to teach for making the ruler able to work for the people and nation the lesson was find remarkable. Confucius, born Kong Qiu, was a Chinese philosopher of the Spring and Autumn period who is traditionally considered the paragon of Chinese sages. Much of the shared cultural heritage of the Sinosphere originates in the philosophy and teachings of Confucius (web). Further instances from China becoming a remarkable to learn about how to manage the socio-economic status of the country that may guarantee the right livelihood of the community people living everywhere.

A remarkable dialogue of Confucious and the prince just being a king of the country went to take advice of the guru, so that how he could rule differently the nation providing every opportunity to the people safeguarding the national sovereignty. Then prince asked to Confucius 'guru what are the three task that may keep people happy and prosperous that I can adopt. Then Guru said you have Ensure sufficient food, maintain adequate defense, Win the trust of the people, then guru said if you managed all three thinking, they are the major task you could discharge to perform the national responsibility successfully. Observing the prince confused guru, Confucius famously noted that if a leader had to give up one of these, he should surrender the weapons first, and then the food. He argued that while basic resources and protection are vital, a government cannot stand without the genuine faith and trust of the citizens. So, as listening the advice of Guru Prince went to the palace to become a responsible ruler of the country.

Like in the same way, Donald Trump the president of super powered country if he had taken the advice from the great economist and political analyst Prof. Jeffrey Sachs, and other eminent intellectuals in the US, would not have been drowned so deep into the blemished pit of devastation fighting against Iran and threatening Venezuela, Cuba, Brazil and some around. If he turned into the right position, he would be renowned in the human world. In the same way, Benjamin Netanyahu also taken advice from the eminent scholar, like Yuval Noa Harari, and some experienced professional like Mr. Hanan, would not be so hardly suffering from the atrocities from the attack and also retaliating the sentimental behavior of the terrorists.

Thinking all about to rule the country balancing diplomatic mission China and Rusia seemingly are different. Both the countries may have been organizing a strong advisory group of intellectuals to go on working how to rule the country. China in this respect habituated to honor the sages like Confusions, the ruler often used to go to the guru and take advice on how to rule the country. Similarly, now such gurus are not figuratively seen in the society even so China has a strong source of intellectual community, that may giving advice how successfully rule the country, they can rule effectively. So, Xi, Jingling and the other leader seemingly becoming successful to build a nation competitive to the world arena. In the same way Russia also has a strong backup of the intellectuals to know how to manage the situation of the country, so, that a single hand fighting against Ukraine and coalition of the NATO, that strongly coming to destroy the security of Russia.

Consequently, personalities experiencing in ruling of the country successfully, they all supposedly living with the independent intellectual groups, so, might be doing by Mahathir from Malasia, Lee Kuan Yew from Singapore in the same way Park Chung Hee, the president of South Korea, while during his time there was a grave famine in the country requesting to support from all around to meet the crisis of South Korea Nepal also supported sending Seven Hundred Tons of rice becoming greatly memorizing matter by the Korean people and government forever.

Resolution of the present atrocities may manage by the guidance of Buddhist lesson Ashtanga Marga (Eightfold Path) that goes as: Right view, Right intension, Right speech, Right action, Right livelihood, Right effort, Right mindfulness, and Right concentration. If the human resource picking from the framework they all would be skillfully dedicated to work honestly in the community people, there would not be any dispute quarrelling. This would be the socio-economic model where everyone equally valued in the community without discrimination. Then the need arising to know all about Asta Ja (Eight Ja),that:, Ja is the letter of Nepali vernacular, forms the name of the resources that goes as: Jal-water, Jamin-land, Jungle-forest, Jarajuri- plants, Jalabayu-climate, Janawar-animals, and Janashakti-human resource, are the group of resources that may find in every corner in the world should be rightly managed for the maintainance of peace in the human world.

Therefore, the need now arising for the maintainance of peace resolving every atrocity that may keep sharply showing their might to fight against the countries such as Russia and Ukraine, and Israel started attack by the Hamas, and also Israel and US, jointly fighting against Iran need to be resolve soon arising the demand of the entire human world.

Part -II

2.Objective and Methodology of the Study

The study presently becoming utmost because of this has been threatening to the world community it's a starting of the Third World war. In this respect this problem should be the matter of study in every university and academic institution to make all aware to become a noble citizen to manage the future world. Therefore, the Objective of the study is to maintain peace stopping every warfare situation hampering in any part in the world.

2.1. Briefly the Objectives could be mentioned in the following points:

- What is the reason to start so devastating war? to be analytically studied from the web pages and consultation of the people around to established a model village situation in the entire world.
- Stop every war situation fighting in any corner of the world bringing them all on the negotiation table to solve the problem.
- Starting an International Peace Center in Lumbini so that every negotiator would be making a place of dialogue with the objective to resolve the problem in the society.

- Stope every arm equipment that becoming harmful to the society.
- Design Model Village community to create peaceful learning environment in the community promoting productivity in the community people utilizing the resources defined in the Asta Ja (Eight Ja) framework.
- Giving the lesson of Buddha Ashtanga Marg for the maintenance of peace in the human world.

Objectively the program that has been highlighted here with the hope to stop the atrocities in any corner in the world consulting different message that are to be collected from the web pages. Hope this paper would be a powerful instrument to make the end of the war and terror in the human world.

2.2.Methodology,

Methodology of the study based on the descriptive analyses of the information that are gathered from the web pages about the war and terror situation in the Middle East Including Ukraine and Russia. Logical presentation of the writers from the books becoming the basic source of the study. Comprehensive analysis of the tragic event of war situation where Nepalese youths also were killed even in Iraq, and also presently the student went for learning agriculture program in Israel were Killed in the attack of Hamas also become remarkable matter to this study. Suggesting an effective negotiation center for peace in the Lumbini in Nepal, the birth place of Buddha.

2.3. Limitation of the Study,

This study mentioned about the designing of Model Village in the entire human world for the right livelihood of the people living in the particular community but that's not possible to go through in this brief sketch of the aspiration of the model. The same articulating as to the ways of Buddhist Economics, that may significantly useful for the improvement of socio-economic system of the entire world adopting the Buddhist Economics that may keep people disciplined who could be desiring to stop war and terror in the world maintaining peace in the human world.

Part -III

3.Analytical Feature for the maintainance of peace

Rejoicing for the settlement of such repugnantly, pain in the world secession is the formal, settlement model that may resolved dispute with unilateral withdrawal of a territory and its population from an existing state to make such territorial part could be join to the related nation or they make their existence forming a new independent nation. This process seems unsolicited matter to the nation, enjoying territorial integrity ignoring whatever the land used to be occupying, may become separated to resolve the deep-rooted conflict among the people living in such part. The reason why the need arising to enjoy the right process to be separated for the maintenance of peace in every livelihood of the community people.

Accordingly, Israel and Palestinian conflict often raising terribly destroying the properties and killing people living peacefully in their own, that also happened due to the occupying land blaming either side in that region. Land occupation problem raising in different nations that so has long been hanging for the territorial conflict for instance that has been raising in between Nepal and India due to the reason the agreement was done with British India but not that was done with present Indian government so that the legal stand of Nepal becoming stronger to back the land from India. Recorded the cases of 'The Treaty of Sugauri was a landmark agreement signed on December 2, 1815, and ratified on March 4, 1816. It formally ended the Anglo-Nepalese War (1814–1816) between the East India Company and the Kingdom of Nepal', (Treety of Sugauli).

Reasonably, disputes arising due to the land and properties that may possess by some of the territories in the world. Accordingly, present dispute between Iran and the US Israel, and also the terrifying war long been happening in between Russia and Ukraine, becoming hard core matter to be easily digested by the entire people in the world. So, as the trajectory of the resolution of the conflict only becomes instrumental for the maintainance of peace in the world that definitely becomes Buddhist guidance, should be followed by every nation including the super powered and each and every human being to be learning the same lesson in the entire world.

After the dissolution of Soviet Union, it's Warsaw, pact closed. The Warsaw, pact, formally known as the Treaty of Friendship, Cooperation, and Mutual Assistance, was a political and military alliance established on May 14, 1955. This pact just as supposed to balance the powered that used to be ambient by the NATO, of the US, alliin pact during the cold war. After the dismantling of Soviet Union this pact closed already, so as the question arising, why NATO till to this date has been actively, surrounding the socialist's nation in the globe.

3.1.Historical Conundrum of the war

Destruction, may generating from the deep ignorance of the socio-economic value and egoistic character of the leader leading to the nation. Accordingly, mesmerizing posture of the society glimpsing gravely after the war happened in between in some of the countries. Careful consideration of war and terror created in some of the countries due to the egoistic manner of the nation they used to be showing strength to win becoming ever terrible event to the human world. For instance, the Falkland ten-week undeclared war between Argentina and the Unite Kingdom in 1982 over two British Overseas Territories in the South Atlantic: the Falkland Islands and its territorial dependency, South Georgia and South Sandwich Islands.

The need now becoming urgently realizing of the pervious war and the impact how the society suffering. After the great world war -I and II, the deadly war happened in the Vietnam WAR taken long period just from 1955 to 1975, was a cold war conflict pitting the communist government of North Vietnam and Viet Cong against South Vietnam and its primary ally, the Unite States. (web). In Vietnam during that period America interned to prevent the spread of communism under the policy of containment, escalating to full troop deployment in 1965 resulting with the loss of 58,000 US, military personal was killed with about 303,000 were wounded in the war. Total Fatalities, about more than 3 million people were killed in the with over half being Vietnamese civilians, this fatality gives right realization to the leader to stop war in any part of the world that becomes harmful to the people around the world. This war becomes the right example of losses the properties, mentioning all about the war lastly ' Vietnamization & Withdrawal (1965-1973): Under resident Richard Nixon, the U.S. began withdrawing troops and shifting combat responsibilities to the South Vietnamese military, (web), definitely becomes the noteworthy lesson to the rulers in the world just as for the US, super powered nation in the world. The realization process becoming effective after the Paris accords were signed in 1973 that formerly removing the U.S. forces from Vietnam.

After such great tragedy from the war the U.S. couldn't realize to stop the war again in this earth, even ignoring the fact the U.S. forming a coalition went to fight against Iraq, even previously they were transitioning their bilateral relationship from a military partnership to a comprehensive economic partnership. However, the interest of the U.S. failed then started to plan to hit Iraq due to the reason why the nuclear weapons were deserving under the rule of then President Saddam in Iraq, was executed by hanging on December 30, 2006, at Camp Justic, an Iraqui military base in the Kadhimiya, neighborhood of Baghdad charging him the crime against humanity by the Iraqi Special Tribunal. (web)

During the war time in Iraq, on August 31, 2004, twelve Nepalese citizens who had been taken hostage by the extremist group, Jamaat Ansar al-Sunna were, brutally executed in Iraq, making them sleeping in line and gunned them one by one till to all twelve dead in that place becoming a hard pain to digest in the Nepalese families and friend and entire people in the country.

Super powered nation is supposed to be leading socio-economic sphere in the world realizing if some were started the conflict that may directly or indirectly terrifying to the entire world. The same happen in Iraq, there twelve Nepalese were killed innocently.

The U.S. Coalition were not in rest even after terrifying and devastating the Iraq went to Afghanistan in 2001-2021, was triggered by the September 11 attacks and aimed to dismantle al-Queda and remove the Taliban, over its two decades spans. (web). Impact of the conflict resulted in the deaths of over 2,300 U.S. military personnel also estimated 46,000 Afghan civilians and the war cost to the U.S. over $. 2.2. Trillian, that evidently a great loss for the U.S. itself, also to be realized that may psychologically keep it to stop war again.

Dubious matter to the world becoming syndrome war repeated again.

With a pause of the war that becoming very sound environment to the world community after the long gap of war in the world. However now a days the world just seemingly blowing with the barrel of gun in Irael, were on 7 Oct 2023, marks the date of coordinated, large-scale armed incursion into southern Israel led by Hamas, Militants breached the Gaza Israel barrier, killing approximately 1,200 people mostly Israeli civilians at kibitzing and the Nova music festival and taking over 240 hostages including Nepalese workers working in Agri farming in Israel. Among the Nepalese one of the mysterious incidents becoming hard to digest by Nepalese, because of the hostage Bipin Joshi from far west hearing he was alive and back from the Hamas camp but after long time his parents and all the relatives including Nepalese community waiting to receive him alive. But alas, report from Israel becoming hard to digest because he was dead during the time of his kidnaping. Accordingly, it this conflict Nepalese youth also dead becoming the great pain of Nepalese.

3.2.Considering impact of war that may realize the devastation for the maintenance of Peace in the human world.

Aspiration of the people around the world to see the super power maintaining peace in the country inspiring all to be peace in their own so far. However, this could not be happening in reality, because the war rooted in Israel accelerated, it to the Iran and around the countries terrifying harshly. Accordingly, Iran was hit by the joint forces of the US. And Israel devastating various parts of Iran disturbing the sea rout of Hermus threatening the entire human world.

The reason why the war needed to be triggering killing people and destroying the community living houses in the country managing the people rightly. Conflict was mounting across the Middle East after the US, Israel launched wide-ranging strikes on Iran killing even the country's supreme leader on 28 February, becoming a great crime that noticed by the prominent writer Jeffrey Sache blaming Donald Trump saying he is changing the peaceful living place into grave yard in Iran. So, as the war conducting by the US, and Israel has not been supported by the intellectuals even from the US intellectuals because they are desiring for the maintenance of peace in the human world.

In this respect President Donald Trump also seemingly becoming so weary about how to tackle the problem raised by himself. Because after his election he was claiming the America Should be the first, desiring to make strong Americas as it's now. So, as Trump likes to reduce the military base in the countries the US, has been deploying.

Because The United States operates roughly 750 to 860 military bases and sites across more than 80 countries and territories worldwide. (web). The military base installed including both major operational hubs and smaller NATO deterrence and rapid power projection in the countries rightly emerging to this time.

Trump thus reminding that he implies the US is providing a great service to Japan and Korea by stationing 50,000 troops in Japan ad nearly 30,000 in Korea, so as he wanted to make military base in both the countries to launch fighting against whoever the U.S, has been attempting. The U.S. and Israel are currently in the process of de-escalating a major military conflict with Iran, shifting from active hostilities to diplomatic negotiations. Despite a signed memorandum of understanding outlining a truce and nuclear inspections, tensions remain high as skirmishes persist in Lebanon and the Strait of Hormuz. (web)

3.3. Ongoing development of peace include:

1. Truce and Nuclear Diplomacy: The U.S. and Iran have signed a memorandum of understanding (MOU) aimed at ending active hostilities and halting military operations on all fronts. The deal includes provisions for Iran to dispose of its enriched uranium stockpile, though the International Atomic Energy Agency is still negotiating the terms and timing for site inspections (web).
2. Strait of Hormuz: The region remains a major flashpoint. Iran briefly took control of the vital shipping route, and the United Nations recently paused ship evacuation efforts in the Gulf of Oman after a cargo ship was struck by a projectile. (web)
3. Frontline Skirmishes: The U.S.-Iran deal is being severely tested on the ground, particularly in southern Lebanon, where Israeli forces continue to occupy a 6-mile deep "security zone" to counter Iranian-backed Hezbollah. Both low-level strikes and diplomatic talks to return parts of southern Lebanon are occurring simultaneously. (web)
4. U.S. Domestic Repercussions: The conflict has sparked significant domestic political fallout in the U.S. Congress is heavily debating how to finance the war, and the U.S. Senate recently passed a symbolic resolution rebuking President Trump's handling of the war and seeking to assert war powers. (web)

Peace becomes the basic part of every development without peace none of the activities in the community and the nation could be happened. Present conflicts in Iran disturbing the track official shipping safety notices directly on the International Maritime Organization (web), they stay updated on international negotiations via AL Jazeera's Iran Conflict Coverage or BBC News on Iran. (web). The news is the result for Negotiation pushed by Pakistan and Geneva becoming a dreamingly hope of the people around the world.

Pakistan is leading international mediation efforts between the United States and Iran to de-escalate a major conflict and permanently secure the Strait of Hormuz. The initial peace agreement signing in Geneva transitioned into ongoing technical-level negotiations in Switzerland, that all hope around the world could be creating a peaceful living of the people in their own countries.

Part -IV

4.Findings and Recommendation

This study on the conflicts that's destroying the properties killing the people in the country Iran, Israel, and Lebanon becoming a great sorrow to the people around the world. Since the attack started on 7 Oct 2023 in Israel many innocents' people were killed by Hamas and other armed Palestinian factions launched a large-scale, coordinated surprise attack on Israel from the Gaza Strip. It was the deadliest single day of violence for Israelis

since the state's establishment, resulting in approximately 1,200 people killed and 251 others taken hostage into Gaza (web).

Attack in Israel at 6:30 morning where militants of Hamas fired thousands of rockets towards Israel and breached the heavily fortified Gaza barrier using explosives, ATVs and Paragliders, in different places. Terrorists were targeting to launching direct assaults on more than 20 towns farming communities (kibbutzim) military bases and the Supernova Music festival, indiscriminately killing civilians and military personals. (web). Casualties from the attacks claimed the lives of over 1200 people including the entire families, children ad the elderly citizens were killed in the attack.

Kidnaping of the people by the militants group Hamas were 251 people, ranging from infants to the elderly including Nepali student Bipin Joshi forcibly transported them back to the Gaza Strips hostages. The kidnaping of the people hostages sparked severe international outcry and prolonged hostage crises (web). The war has caused humanitarian crises and severe regional instability over the entire region. In the attack nearly 1700 civilians' death, including Ayatollah Ruhollah Khomeini, the founder and first Supreme Leader of the Islamic Republic of Iran, died on **June 3, 1989**, at the age of 89. In this attack thousands of injured and the internal displacement of over of more than 3.2 million Iranian to the safe parts as so far managed. Extensive damage to petrochemical, metals and all the infrastructure in the countries what economically significantly contributing to the nation. Due to the reason of war the petroleum supply through Hermus, also disturbed in the reason so as the fuel price has been raised and the supply of necessity goods for survival including medicine becoming difficult to fine easily paying reasonable price.

U.S. Domestic Repercussions: on the conflict has sparked significant domestic political fallout in the U.S. Congress is heavily debating how to finance the war, and the U.S. Senate recently passed a symbolic resolution rebuking President Trump's handling of the war and seeking to assert war powers. (web)Therefore, the impact of the war becoming difficult to the people around the region need to be solve the problem soon.

4.1. Start peace process for the welfare of human world.

Definitely the war if striking in any part of the world that become substantial difficult to resolve with general efforts of the people and the government so far. Paying serious concern over the issue following recommendation have been suggested to the concern parties directly involved in the conflicts and the other who desiring to resolve the problem in that region soon following recommendation given in points here as:

4.2.Learning the lesson of Buddha Ashtanga Marga for the management of resources defined in Asta Ja (Eight Ja) framework.

Consequently, maintenance of peace in the human world through the way of learning the lesson of Buddha's Ashtanga Marga to make people aware to become a noble citizen of the countries where they are residing managing the resources available in the nature. The resources defined in the Asta Ja framework: here ja is the letter of Nepali Vernacular, forms the name of the resources so that the resources categorized into eight groups so as: Jal-water, Jamin-land, Jungle-forest, Jadi Buti-medicinal and aromatic herbs. Jarajuri-plants, Jalabayu-climate, Janawar-animal and Janashakti-human resource defined with proper groupings might be used perfectly. Defining, the resources simply identify the resources even there remain the task how to manage them well producing rightful products for the use of people at large so that they may fully satisfied with the products consuming them daily. Realizing the way how to manage here needs to pickup the human resource to make them trained so that they become a noble member of a model village community, with the lesson of Ashtanga Marga of Buddha. Here the

Ashtanga Marga goes through eight steps: Right view, Right intension, Right speech, Right action, Right action, Right livelihood, Right effort, Right mindfulness, and Right concentration. If everyone in the community living learning the lesson they all would be noble member of the community, never fight, never quarrel, and never stand for conflicts so that peace would be generated though every model village committee, that may become a great source of maintainance of peace in the human world.

4.3.International Organization must be attentive to solve the problem:

Consequently, such devastating war destroys many of the humanitarian living places. The same happen in Israel and Iran, also in Palestine in the attack of Israel. Therefore, the war becoming just as useless one and need to be resolve soon. For that the international organization like the United Nations Organization, International Atomic Energy Agency (IAEA) and all the related organization should be looking after the ways how to resolve the conflict.

Most of the international communities must be unitedly sit in the meeting to find out the solution of the problem so that the conflicts would be amicably resolved suggesting to the parties involved in the war situation to stop the war safeguarding people and protecting the public places with due conscientiousness.

4.4. Establish an International Peace Center in Lumbini the Birth Place of Buddha.

Establish a negotiation for the maintenance of peace center in some parts in the world that definitely becomes the birth place of Buddha Lumbini. If established an International Peace Center that will be a heartland of the entire peace-loving people who used to be maintain peace in their every livelihood community in the world. If the negotiation center established in Lumbini Negotiator would not be confused where to go for Negotiation just in this case some' times Pakistan, Geneva and other place of Gulf countries would not pave the ways for peace meaningfully. So, that the Buddhist place would be the right place for negotiation.

Part-V

5.Concluding Remarks

It's well to be suggest forwarded for the welfare of the people residing in the countries that would be the major resolution to come to the point of peace in the entire world. However, in the case of US, Israel fighting with Iran couldn't be asserted the intellectual support from the great thinker. The reason why Donald Trump the US President and Netanyahu the prime minister of Israel vehemently attacking Iran killing civilians and destroying many of the public places in Iran becoming a great shock in the human world. Donald Trump and his partner Benjamin Netanyahu are in war crimes, they are said jointly waging a war of murderous aggression against Iran, a nation of 90 million people. In this war they are in the grip of three cascading pathologies, 1 is personality, because both are malignant narcists, 2. the arrogance of power, men who possess the power to command nuclear annihilation and feel, in consequence to restraint, and 3. Very dangerous becoming the religious delusion, who believing that they are messiahs, doing what claiming, and doing what they are believing the messiahs doing such crime. With such characteristic behavior of both the giant all around the intellectuals astonishing why so they are choosing the Thorney path. Consequently, characteristically both the leader what they are attempting each pathology exacerbates the others, so that together they are putting the human world in unprecedented danger.

However, these all the horrific movement started with underlying psychological disorder, of both the leaders, Sir Jeffrey, writes. Reminding the psychologist Erich Fromm coined the phrase in 1964 to describe Adolf Hitler as a merger of pathological grandiosity, psychopathy, paranoia, and antisocial personality into a single character

structure' evidently mentioned in the writing of Sachs. Assignment, what they have pushed to their arm forces, already back in 2017, psychologist John Garnter and many other professionals were warning to Trumps malignant narcissism. Crusading, such a grievance, 'both Trump and Netanyahu fit this profile with precision' Jeffrey says. While 'Trump psychopathy was on full display when US, forces destroyed a civilian bridge in Tehran, of no military significance with at least eight civilians killed and 95 or more injured' on the attack, they are assured with the attack there only the triumphant catalog of enemies he has destroyed.

Concerning to the war and criminal action unfortunately happen in Iran and also retaliating effort of Iran destroying the military base in the Arabian Countries including Israel destroying a lot of properties and the lives destroying humanitarian base becoming a great shock to the human world. Observing all these, Pakistani effort for the maintenance of peace dignifying of human raising hope of the entire human society in the world. Based on conversations with prime minister Shehbaz Sharif and Field Marshal Asim Munir, of Pakistan and wherein they requested that to hold off the destructive force being sending Iran, and subject to the Islamic Republic of Iran agreeing to the complete immediate and safe opening of the strait of Hormuz, with agreeing to suspend the bombing and attack of Iran for a period of two weeks, becoming a great hope to see peaceful settlement of the dispute in that region.

Identifying all these matters Nepal may explore the way how to settle all the dispute raising in US, Israel, against Iran, and also long disputing in between Ukraine and Russia and more, safeguarding human being maintaining model village in every part in the globe giving lesson of Ashtanga Marga of Buddha that may become instrumental capsule even to the super power nations they may possess their peaceful livelihood in their territory. So, Buddhism could be one that may keep all silent stopping the threats of third world war. So that well acceptable measure becomes the Buddhism that guarantees the international harmony maintaining Peace In the human world.
